Facilitator	Alexandru	Minutes	Dan
Absent	-----		

Meeting Agenda

1. Discussion on project progress

All members go to the Task section

Discussion Topics

Discussion on project progress

- Madjid voiced his concern for the project:
 - Too many tasks
 - Not enough organization
 - Proposes to shift the objective of the project for future weeks
 - Use marketplace as a place for users to place their listing and have their phone numbers so that other users can contact by phone number.
 - Suggests that this will reduce our overhead.
 - Will need to pitch the idea to the TA
 - If the TA does not accept we would need to work on how the project is organized
 - Alexandru will talk with the TA on monday
 - Will have a team meeting on Tuesday
 - Kiro:
 - Suggests that down the line, the workload may not be as hard as we think it is
- Project Progress has been all over the place
 - This has slowed us down
 - Scrum Master will put priorities on each task
 - Scrum Master will add task dependencies for each task
 - Will help us know which task will slow down other tasks

-
- We have learned that putting @Everyone for a task is a bad idea since no one knows exactly who's working on it and there is no accountability.
 - To fix this, we shall assign certain members
 - This is against the pull system of Agile process, but this is the team's decision
-
