

ECSE 428 Weekly #03 | MINUTES

Date	2022/02/15	Location	Zoom/In-Person
Time	9:00	Purpose	Week 2 Prep
Facilitator	Alexandru	Minutes	Dan
Absent	Kalvin, Kiro		

Meeting Agenda

1. Review Week 1 progression and what can we change for week 2.
2. Discussion for Week 2 preparation.
3. Pull System Task.

All members go to the Task section

Discussion Topics

Review Week 1 progression and what can we change for week 2

- What needs to change:
 - Assign priorities for each task and decide which user story is dependent on others such that we can put more focus on a certain user story.
 - Will lead to less impediment.
 - More organized
 - Clear separation of tasks and no use of @everyone
 - Added estimated effort (story points)
 - Gives the scrum master an idea of the timeline
 - Remember to not push broken code

Discussion for Week 2 preparation

- Have to figure out why Heroku is not working
 - Failure to build with duplicated method in interface
 - Hongyi fixed these issues yesterday but no pull request yet

- Alexandru will fix this
- Facebook API
 - Single sign on
 - Gherkin test for this task is for the frontend
 - It exists one for the back
 - Mircea suggests it will be better for the frontend
 - Mircea will send the Facebook project invite
- Metamask frontend
 - Plan on having a page
 - When you register it will lead the user to that page
 - When an already registered user wants to link/unlink, click button on the drop down menu bar to unlink which brings to the page
- Figma Design
 - Have a meeting for each button click
 - Don't go too deep into the css
 - Allows us to work in parallel

Pull System Task

- Gave out tasks for US006 and US007
